

In this lesson, we will learn...

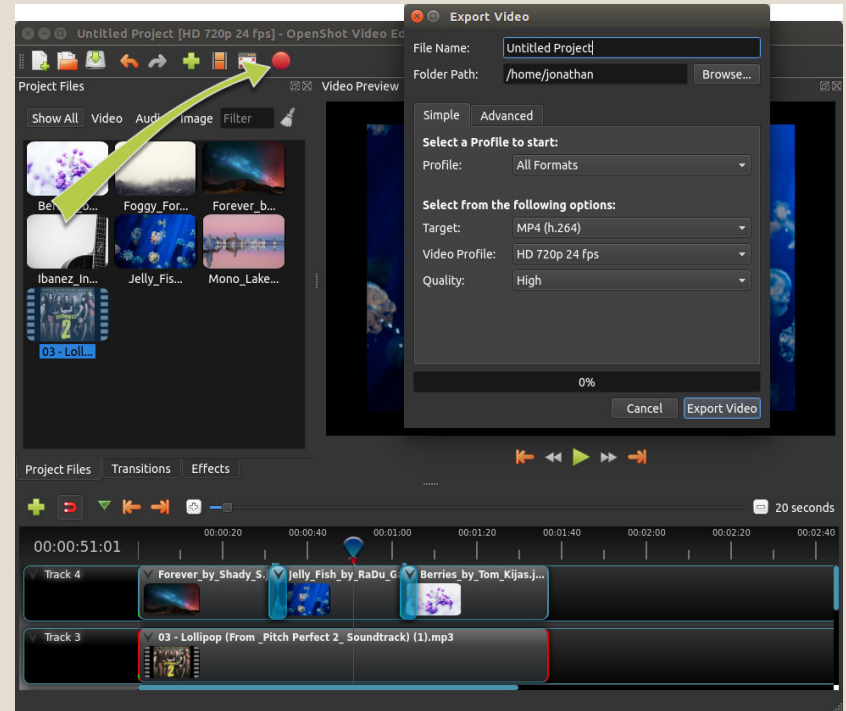

1. Which the necessary steps are to export a project made with Openshot.

STEP 1

"Export Project"

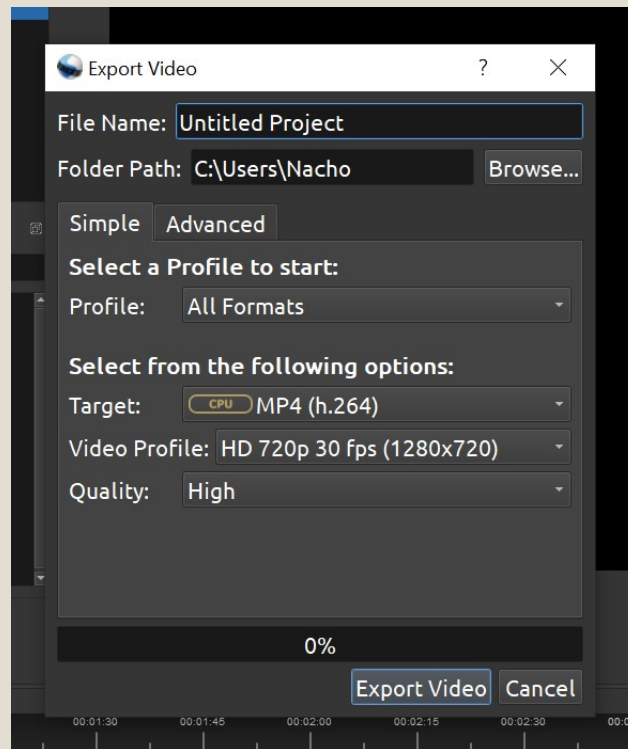

Click on the red icon or
"Export Project" option
on the "File" menú.

STEP 2

Set "Name" and choose "Path"

"Export Project"

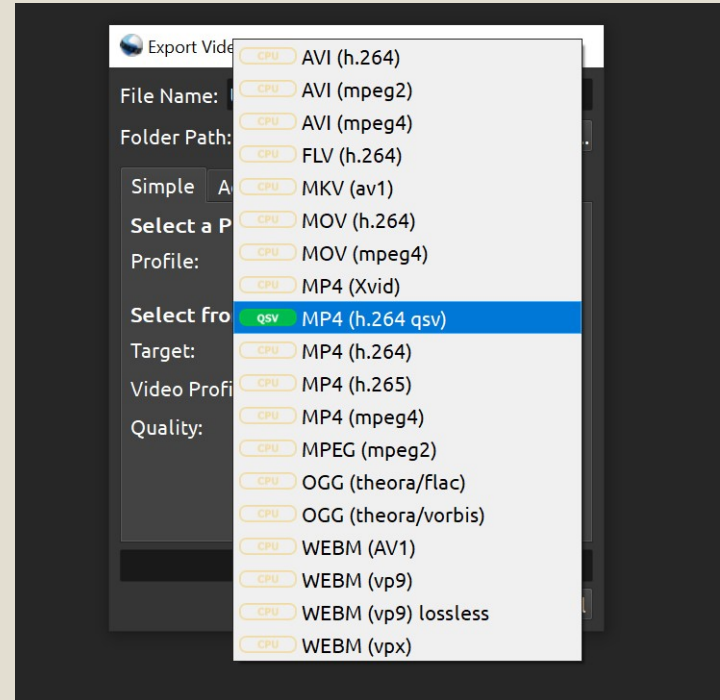

STEP 3

The most common export selection is MP4(h.264). This one covers every platform and every software that plays videos.

“Export Project”

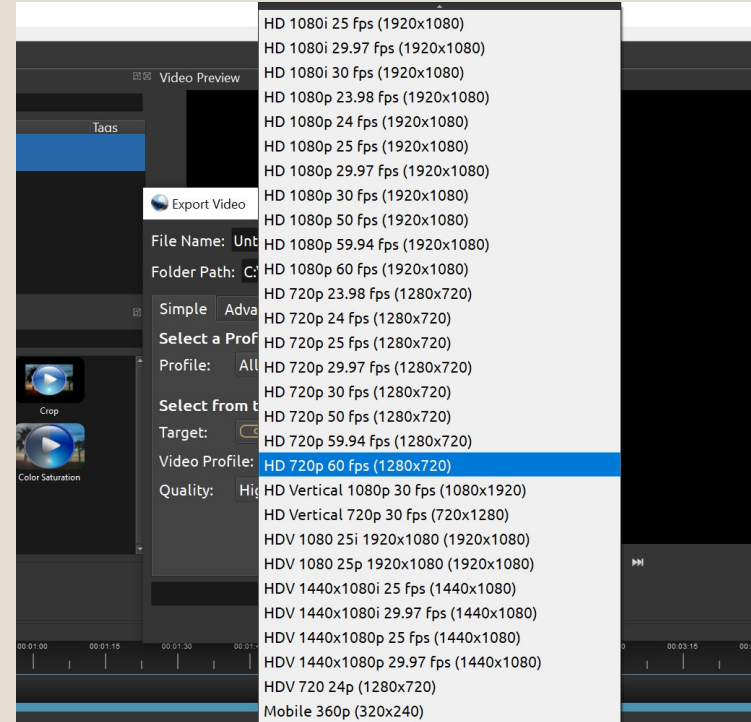

STEP 4

Choose your Video Profile:
Check the format that is
closest to your original video
resolution and fps value.

“Export Project”

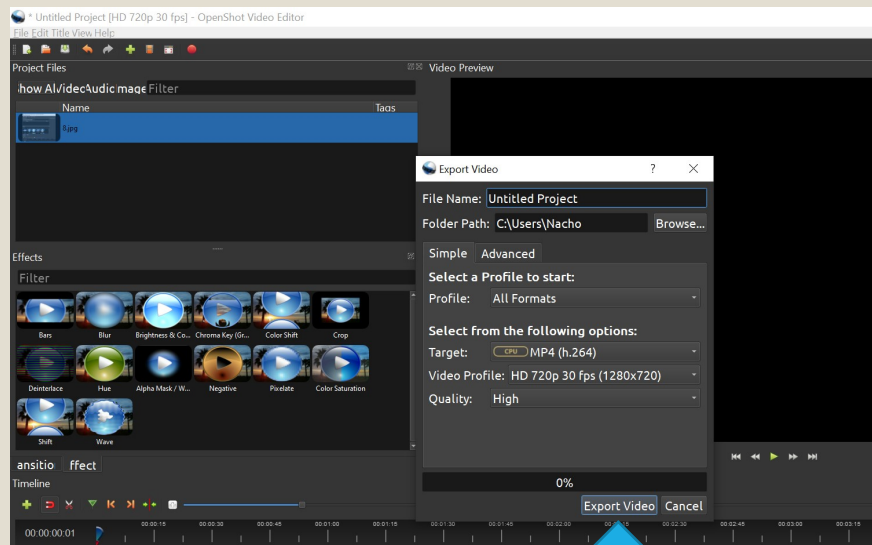

STEP 5

Last step is to click the
“Export Video” button.

“Export Project”

Conclusions

This is what you need to know about the Export Settings in OpenShot. It's very easy and simple. The right exporting settings can take your project to another level!
