Topic 2. Sound and
Script

Lesson 1. Writing a script
for a certain multimedia
content

Co-funded by the
Erasmus+ Programme
of the European Union

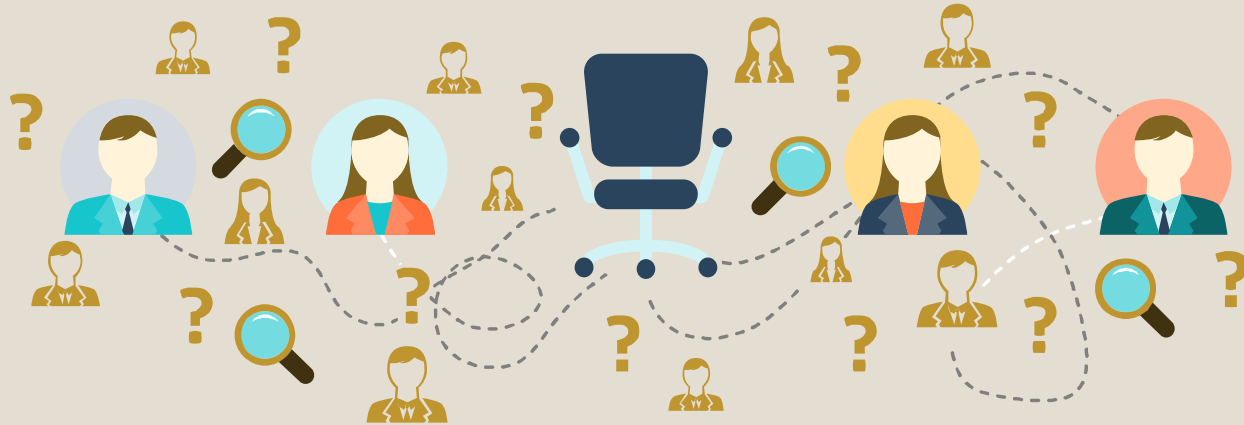

In this lesson, we will analyze...

...the main features of the script and the audiovisual resources that we will use in the project.

What is a documentary video?

A documentary is an audiovisual work that represents the most relevant aspects of the heritage reality and whose purpose is informative and pedagogical

But what information do we need to know?

And how should we explain it?

- ! structure and mode of narration of the documentary script

Stages for creating the script

1. The idea

2. The research

3. Synopsis and narrative structure

1

The idea

The first thing is,
as in everything,
the idea.

In order to highlight the
main characteristics of
the heritage asset.

2

The research

The script is based on the research carried out, so this document represents an idea of its true dimension...

The deeper the research, the greater the chances of the script.

3

Synopsis and narrative structure

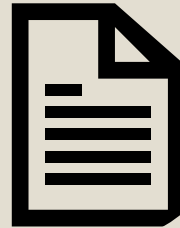

We must think about:

what we want to tell

what the objective is

how we are going to tell it

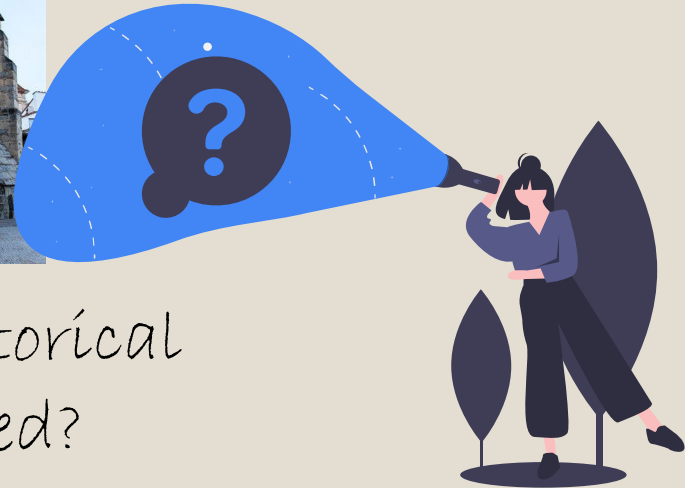

With these definitions, we will write a script of intentions.

For example, what do you see in this photo?

What would you say about the historical building that you have portrayed?

You could talk about the city and the historical period in which it was built.

You should mention the construction characteristics of the building.

You will have to disseminate its values and the contemporary functions or uses of the building.

- Conclusions

Correctly explaining the characteristics of the heritage element will help spread its values.

If we show, we sensitize ...
If we sensitize, we
protect!
